

manebí, a small and delightful spot in st. tropez, is the place where our idea took place and where our travel began

it all started from the inspiration of a group of friends whose passion for summer comes only second to their passion for travel

while spending a great time in the stunning côte d'azur, we were looking for a great pair of shoes we could be wearing comfortably and fashionably all day long, from daytime to nighttime

we thought of the classic espadrilles and reinterpret them to be the perfect shoes for each and every of our travels: from the seaside to the city and the world over in between

our philosophy

our philosophy is to create shoes for every occasion, from a beach day to a great summer party. manebí espadrilles are the perfect shoes for all of your travels: from the most exotic beach to the most chic and glamorous city in the world

100% natural jute sole

natural rubber

manebí espadrilles are handmade using century old techniques, which make each pair different and unique. our espadrilles have a spanish soul as they are made by expert craftsmen in la roja and an italian touch as they are designed in milan
