

VEILANCE — SPRING / SUMMER 2021 A ZERO GRAVITY SYSTEM

Veilance introduces its Spring / Summer 2021 collection — a zero gravity system designed for total freedom. With a key focus on super lightweight highly breathable materials and adaptable silhouettes, this season seeks to remove all restrictions that come with dressing in the warmest season.

“The driving principle in outdoor is to make gear as lightweight as possible, enabling people to go further, faster,” explains Creative Director, Taka Kasuga. “We’re exploring how this concept can be applied to a daily wardrobe. By shedding all excess weight from our products while maintaining weather functionality, the wearer can better focus on their passions and pursuits.”

Finding inspiration in the work of Tomás Saraceno, whose [Aerosolar Journeys](#) calls for the right to mobility, SS’21 offers adaptability in versatile forms that provide real-world performance benefits. Between an expanded Fast and Light capsule, new Terratex™ silhouettes, and ultralight insulated layers, this is Veilance’s most comprehensive warm weather collection to date.

BUCKET HAT

Veilance's first bucket hat is a waterproof GORE-TEX 3L C-KNIT™ rendition with a hidden cord adjustment system. Pair with the updated Partition LT Coat of the same material for streamlined waterproof protection.

QUOIN IS

A super lightweight insulated jacket and vest made from a DWR finished ripstop nylon and Coreloft™ fibrefill. Strategically placed stretch woven panels increase breathability and ease of movement, making these pieces ideal for layering and travel.

SPERE LT

Made from lightweight and breathable Terratex™, the Spere LT package features a new military inspired 6-pocket hoody, a classic collared jacket, and a relaxed fit ergonomically patterned pant.

HAEDN LT

The Haedn LT package is a set of three new silhouettes constructed from sustainably sourced lightweight performance wool, finished with PFC-Free DWR for a light layer of weather protection. Silhouettes include a Blazer, Pant, and Short Sleeve Shirt.

DEPLOY LT JACKET

New in hard shells, the Deploy LT Jacket offers pinnacle wind and water protection, made from GORE-TEX's lightest 3 layer C-knit. A moulded WaterTight™ zipper curves away from the face, giving this piece its distinct look.

DEMLO COLLECTION

A staple in the Fast and Light capsule, the Demlo is updated this season in three new silhouettes. These super lightweight nylon shells offer highly breathable water resistance, making them perfect pieces for the hottest climates. Now available in a Coat, Pullover, and Shirt Jacket.

The SS'21 collection will launch January 2021 on veilance.com, Arc'teryx stores, and partnered global retailers.

ABOUT VEILANCE

Founded by Arc'teryx in 2009, Veilance applies minimalist values and advanced technical construction to its line of climate controlling systems. Based in Canada's west coast mountains, Veilance engineers performance products for every interface and environment.
