## WHY BUY FROM CAMBRASS?

## COTTON

Find the best cotton producing countries in the world.

Selection of the best harvests of cotton each year.

The cotton is used at CAMBRASS is from EGYPT.

## COTTON

The length of the fiber and its origin, success of softness and durability in our garments.

DENOMINACION	LARGO DE FIBRA	CLASIFICACION DE ALGODÓN
FIBRA CORTA	-20	ASPERO
FIBRA MEDIA	21 - 26 MM	UPLAND
FIBRA MEDIA	27 - 32 MM	TANGUIS
FIBRA LARGA	33 - 38 MM	DEL CERRO
FIBRA EXTRA LARGA	+ 38 MM	PIMA

Cambrass takes care of the selection of its cottons rigorously in all the garments.

## TENCEL™ THE INTELLIGENT FIBER

## TENCEL™ GENTLE ON SKIN

Fabrics with cellulose TENCEL<sup>™</sup> Lyocell fibers guarantee that the totally natural composition will give the baby a high level of comfort, in any given situation. The softness of the garment is a fundamental priority these days for the well being of the baby. The softness which TENCEL<sup>™</sup> Lyocell fibers offer avoids skin irritations.

## TENCEL™ MAINTAINS THE BABY'S WARMTH

The use of fibers with natural origin such as TENCEL<sup>™</sup> Lyocell permit the garment to retain heat in the winter and allow for transpiration in the summer. Since it is an intelligent garment, it avoids the build up of static in reach of your baby.

Fabrics with TENCEL<sup>™</sup> Lyocell fibers do not allow lime scale to develop and dry quickly. The composition does not allow the garment to lose it's original shape, even after prolonged washing. It does not shrink, it does not crease and it's upkeep is simple.

# TENCEL™ UNFAVORABLE FOR

### BACTERIAL GROWTH

Bacteria have no hope with TENCEL™ Lyocell fibers. It's capacity for moisture absorption cuts out the possibility of bacteria growth, since the moisture is immediately carried to the core of the TENCEL™ Lyocell fibers.

## TENCEL™ BOTANIC ORIGIN

A CAMBRASS<sup>®</sup> garment manufactured from TENCEL<sup>™</sup> Lyocell fibers is an environmentally sustainable product. For the production of a cotton body 6 square metres of land are required. For the same area of land 10 TENCEL<sup>™</sup> Lyocell fibers bodies may be produced. The same applies to use of that much scarce resource, water. The production of cotton requires 100 times more water than for TENCEL<sup>™</sup> Lyocell fibers. For the manufacturing of the fabric no chemical products are used and it's composition is completely biodegradable.

COTTON 6m<sup>2</sup>

## **PRODUCT BOOK**

## **MADE IN SPAIN 100%**

#### I make *Made in Spain*

For more than 30 years the basis of our philosophy has always been to support the quality of our product and our service. This quality has been acknowledged by the national and international markets. Proof of this is that today more than 70% of our production is exported to external markets (in more than 54 countries of the 5 continents). This situation has led to the acknowledgement of our work with prizes such as the two export prizes of the Chamber of Commerce of Valencia, the diploma *Supersales* of Spain of the magazine *Actualidad Económica* or the Export Certificate to Japan Programme of the government of Japan.

Yes, our 100% quality Made in Spain products have always been our main banner, a hallmark trusted by customers all over the world. But this would not be possible without our employees. Our employees deserve our utmost appreciation, because they make it possible for us to offer to the international market a product made in Spain. Our employees are proud of this product and so are we.

"Manufacturing in Spain allows us to control our product at all times and this has an effect on the quality"

**POSICIÓN ANATÓMICA** ANATOMICAL POSITION

# Cuñas antivuelco Baby wedges

### **WELLNESS**

### *El bienestar de tu bebé es lo más importante. Your baby's well-being is our priority.*

*Mantiene al bebé acostado cómodamente de lado. Keeps the baby comfortably sleeping on its side.* 

*Sistema antivuelco que permite el movimiento del bebé. Anti-roll system allowing the baby to move.* 

A partir de cierta fase de desarrollo en la que el bebé ya puede mantener la postura de forma autónoma, ya no es necesario su uso.

Use of the wedge is no longer necessary as from the stage in the baby's development when it can maintain the sleeping position by itself.
