The capsule collection, which welcomes us with the winter effect of gray and the perfect harmony of pink orange in the Wild Magenta theme, integrates its dynamic spirit with street fashion.

While enriching with the voluminous sleeves and piping details that dominate the theme, the combination of frilly skirts and sports cuts brings a youthful spirit to the collection.

In the **Geo Artisan** collection, we witness the artistic blue daisies integrating with the world of dreams and preparing the ground for an assertive look by gaining a new interpretation with line patterns. Print designs, where artistic touches are at the forefront, combine with different cup cuts and ruffle details. While the luxurious texture of the quilting and the warm tone of the sax blue increase the harmony of the theme, it offers stylish designs that can be easily adapted to daily life.
