

London, UK - May, 2024 - Tateossian presents their latest collection entitled *Odyssey of Luxury*, a celebration of the brand's continued commitment to curious craftsmanship and intricate design. Set to premiere at Pitti Uomo SS25, the new collection draws inspiration from ancient symbols, industrial innovation, the allure of the night sky, and modern man's curious spirit.

### *Mystic Mosaics*

Tateossian's exploration into unique and ancient symbols is prominently displayed in the *Mystic Mosaics* collection. Revered as one of the oldest mystical symbols embodying luck, health and rebirth, the snake has been expertly woven into Tateossian's latest textured "Viper" cufflinks for the upcoming Chinese Year of the Snake. Similar symbolism arises in the exquisite "Milos Evil Eye", featuring a mother of pearl Evil Eye stone, and "Paros Evil Eye" necklace, ringed with an iris of sapphires and hand-painted white enamel.

### *Celestial Reflections*

Designed for those who marvel at the wonders of a night sky, *Celestial Reflections* combines the elegance of indigo with the deep contrast of gold and silver. Bearing an intricately constructed silver spiderwebbed frame, the limited-edition "Satellite" cufflinks have been designed to mimic a cabochon Tourmaline star amidst the night sky. With irregular cube-shaped interlocking beads that effortlessly stretch around the wrist, the newly-introduced "Santorini Bracelet" is an ode to the island's glistening nights.

### *Innovative Horizons*

Uniquely blending the industrial age with Tateossian's signature ingenuity, the Innovative Horizons theme has been designed for the contemporary man. Inspired by the intricacies of a gyroscope, the "Orbit Gear" cufflinks come complete with three independently spinning rings nested within one another. Featuring an upcycled watch movement at its heart, the "Tonneau Skeleton" cufflinks have been intricately crafted from base metals and finished with a hand-painted line of enamel. Shimmering between hues of either black, brown or blue amidst its matte black clasp, the new "Chevron Click" bracelet has been curiously crafted from IP stainless steel.

### *Spirit of Adventure*

Designed for the modern man's curious spirit, Tateossian has kept the thrill of sport at the theme's forefront, notably with the "Ascot" cufflinks, featuring a 3D stirrup design set against an elegant backdrop of onyx or white mother of pearl. From engraved Actinolite, to black Tourmaline and one-of-a-kind Dendritic Agate, the spirit of adventure permeates the limited edition "Stones of the World" cufflinks. To complete the look of the adventurous man, the "Giza Cobra Pelle" bracelet effortlessly blends the best-selling Cobra braided leather bracelet with a unique button clasp finished with a pyramid-inspired 3D diamond design.

### About Tateossian London

For over three decades, Tateossian London has been synonymous with refined and meticulously crafted accessories.
